

Product information sheet : Honeychop Senior

Overview:

Honeychop Senior is the perfect fibre choice for your veteran. It is a blend of chopped oat straw with added alfalfa, mint, oil and a very low sugar dressing.

- A blend of high fibre oat straw, alfalfa, mint and oil
- Low sugar short chop
- Easily digestible
- Easy to chew

The perfect fibre feed for the older horse, or pony. It is made with only the finest ingredients which all have known benefits to older horses and ponies. Being a short chop, it decreases the need to rely so much on the teeth for cutting, which is great for those who suffer from poor oral health.

Alfalfa is higher in protein than grass and hay, making it ideal to improve condition. It is also a rich source of calcium and has a higher overall vitamin content than regular grass or hay.

The inclusion of oil helps horses and ponies maintain strong hooves, glossy coats and better all-round condition. It is a great source of natural Omega 3 and an important aid to digestion. It is also known to have beneficial effects for horses with stiff joints.

Mint is germicidal and a breath freshener. It takes care of oral health by inhibiting harmful bacterial growth inside the mouth by cleaning the tongue and teeth. Mint is a good digestive aid and an excellent appetiser making it very appealing to fussy feeders.

Honeychop Senior also contains limestone flour, which is a calcium supplement for horses and vital for healthy growth, strong bones, teeth and hooves.

Allergens & Info. :

- As with any new feed introduce gradually to give your horse's digestive system time to adjust.
- Always make sure your horse, or pony has access to plenty of clean fresh water and that good dentition is maintained.
- Feed according to work load, conditions and temperament.
- And remember, a scoop of fibre before riding will help prevent acid splash in the stomach.
